CITRIX APP LAYERING
JUMP START

OVERVIEW:

During this Jump Start, Choice Solutions will take you through the process of setting up the Citrix App Layering Infrastructure along with the required workflows for App Layering, and Image publishing. At the completion of the engagement, you will have the knowledge required to maintain the environment and the confidence to continue building on the Citrix App Layering platform.

A single Hosted Shared Desktop/Application Server or Hosted Virtual Desktop catalog and a single Delivery Group will be created to allow for functionality testing. Knowledge transfer will be provided throughout the Jump Start to ensure Customer is comfortable with the App Layering workflows. In addition, Choice Solutions will include time for a high-level image strategy discussion and a review of Layering recommended best practices to assist Customer through the App Layering/Image Management journey.

OUR SERVICE OFFERINGS:

THIS CITRIX APP LAYERING JUMP START WILL INCLUDE THE FOLLOWING:

This offering will cover the tasks which are required to provide basic functionality testing and knowledge transfer to allow for handoff to Customer. Testing will be done throughout all phases; the tests below are shown to ensure validation checks are complete. This offering does not include extended Pilot or Production rollout as this is intended to be a 'Jump Start' only.

- **Core Layering Component Functionality Tests**
  - o Test Citrix App Layering Packaging process for five applications
  - o Test Version update for One Application Layer
  - o Test and confirm as well as adding a version to a single layer
  - o Test assignment and packaging of one Elastic Layer
  - o Test Publishing One Image Template
  - o Test to ensure Elastic Layering is working for the assigned application group
- **Core ELM functionality Tests**
  - o Validate AD authentication works
  - o Validate ELM share connectivity
- **Citrix Provisioning Integration Testing**
  - o Test deploying newly published App Layering Image (MCS or PVS)
  - o Test either one MCS or PVS catalog creation
- **Basic Citrix Launch Validation**
  - o Ensure test users can successfully connect to the ELM provisioned HSA/HSD or HVD resource
- **Customer Hand Off**
  - o Review Citrix App Layering recommended practices
  - o Review Customer Image Management Strategy with the Citrix App Layering Platform

*Approximately 3-5 day engagement
