

MICROSOFT ACTIVE DIRECTORY HEALTH CHECK

OVERVIEW:

Many of our customers want to achieve a more streamlined and standard desktop environment which relies heavily on the standardization of Microsoft Active Directory objects and policies.

Some of their objectives include the follow:

- Standardize and optimize the current state Active Directory objects.
- Standardize and Streamline logon scripts and processes to optimize end user logon time.
- Standardize Active Directory security groups to allow for streamline application distribution.
- Simplify the profile and printer mappings process.

The Choice Solutions team specializes in helping customers achieve these goals by leveraging our proven methodologies and industry best practices which is critical to the success of your Microsoft Active Directory project.
