

NUTANIX

NCM STARTER JUMPSTART

OVERVIEW

Nutanix Cloud Manager (NCM) Intelligent Operations (formerly Prism Pro/Ultimate) is an end-to-end management and operations solution for hybrid cloud environments that brings unprecedented simplicity by combining several aspects of administration, reporting, and intelligent automation for IT Operations. NCM Intelligent Ops is available in NCM Starter and Pro tiers.

Intelligent Ops includes a powerful application and VM-centric capacity forecast, planning, and optimization engine powered by Nutanix's X-Fit algorithm.

Intelligent Ops' X-Play links intuitive signals with automated actions. Build codeless automation routines and improve operations productivity.

OUR SERVICE OFFERING

THIS JUMPSTART WILL INCLUDE THE FOLLOWING:

Choice Solutions Jump Start for Nutanix Cloud Manager (NCM) Intelligent Operations accelerates the configuration of advanced analytics and intelligent insights into managing the Nutanix Cloud Platform (NCP) with in-depth expertise from highly skilled consultants. This offer is ideal for the Deploy stage of a Hybrid Multicloud journey.

Highly skilled consultants with solid domain expertise and rich experience begin an enablement session. After the enablement session, the consultant configures NCM Intelligent Operations.

The service includes the following activities:

- Conduct an NCM Intelligent Operations enablement session
 - Demonstrate utilization forecasting and what-if analysis
 - Demonstrate VM right-sizing using X-Play
- Create 3 custom reports
- Create 3 custom dashboards

A more in-depth jump start is available as a follow-up that enables additional playbook development and customization of the customer environment.

PRE-REQUISITES

- Existing functional cluster on current supported AOS code
- Existing NCM Starter or higher deployed and functional, running a supported version
- Validated backup system or pre-production cluster already in place
- Valid NCM Starter licenses or trial period licenses available
- Ability to resize NCM Starter VM, if needed, to support chosen scenario

DELIVERABLES

- Product enablement
- Knowledge transfer delivered as items are configured

Typically a half-day engagement.
