CITRIX CLOUD SERVICES
JUMP START

OVERVIEW:

The objective of this project is to provide you with implementation services for the Citrix Cloud Virtual Apps and Desktops (VA&D) Jump Start offering. The Jump Start offering is designed to assist you with standing up Cloud Connectors and integrating with Citrix Cloud Control Plane. The intention being, to provide you with a Pilot environment to test the Citrix Cloud VA&D service fully. Phase One will include a Citrix Cloud Service overview of the features/functionalities to allow you to understand the full potential of the Cloud Services functionality.

During this Jump Start, Choice Solutions will take you through the process of setting up the Citrix Cloud VA&D environment along with the required machine catalog, delivery group and if required up to three published applications. At the completion of the engagement, you will have the knowledge and confidence required to maintain and expand the environment when necessary.

OUR SERVICE OFFERINGS:

THIS CITRIX CLOUD SERVICES JUMP START WILL INCLUDE THE FOLLOWING:

- Review of Citrix Cloud Service including a walkthrough of the platform
- Planning discussions and environment prep to support Citrix Cloud
    - Determine one workload type (Hosted Virtual Desktop, Hosted Shared App/Desktop) for integration with Citrix Cloud for functionality testing
    - Review On-Premises versus Citrix Cloud hosted StoreFront/NetScaler Gateway design
    - Review Active Directory (AD) Integration
    - Validate outbound connectivity to the Citrix Cloud Control Plane
- Citrix Cloud VA&D service Integration
    - Create subscription using an administrator account
    - Install and configure High Availability (HA) pair of Cloud Connectors
    - Ensure AD Domain is showing correctly in Resource Zone
    - Integrate with Citrix Cloud hosted StoreFront/Workspace and NetScaler Gateway Service
    - Basic Branding leveraging built-in branding functionality of Workspace
- Integrate with On-Premises resource location/hosting infrastructure
    - Create one Machine Catalog, one Delivery Group, and if applicable show Customer process for publishing up to three applications
- Review of Citrix Director functionality
- Knowledge transfer on administrative and operational aspects for Citrix Cloud deployment

OPTIONAL SERVICES : **Integrate with On-Premises StoreFront and NetScaler Gateway**

*Project Timeline: Approximately 3-5 Days
