Nutanix
Flow Network Security Jumpstart

Overview

The Nutanix Flow Network Security Deployment Jump Start Service focuses on collaborating with customers to enable micro-segmentation utilizing Nutanix Flow in a basic configuration to accelerate solution deployment and customer adoption.

- Implements Nutanix Flow Network Security in a simple configuration to speed initial adoption and enablement
- Mitigate risks and accelerate time to value by leveraging our knowledgeable and experienced consultants
- Gain understanding through rapid knowledge transfer on the most common configuration and operations topics

Our Service Offering

This jump start will include the following:

- Provide product overview and architectural enablement
  - Integrate between AHV, AOS, Prism Central and Flow
  - Discuss Flow Network Security feature set
  - Conduct deep dive into Flow Network Security constructs
- Configure and customize one of the following supported scenarios:
  - Three-tier server application with up to five (5) total VMs
  - Configure up to one Isolation Environment policy
  - Configure up to one Quarantine policy
  - VDI policy including support for AD groups
- Conduct knowledge transfer session on as-built policies

PRE-REQUISITES

- Existing AHV cluster on current supported AOS code
- Existing Prism Central deployed and configured
- Validated backup system already in place or pre-production cluster
- Valid Flow Network Security licenses or trial period available
- Active Directory service account available for use with VDI policy, if needed

DELIVERABLES

- Product enablement session
- Knowledge transfer session

This estimate is based on a single Prism Central Environment, typically a 2-3 day engagement.*
